Section 2.1 - Treasury Bills

General Characteristics

The following general characteristics apply to Government of Canada treasury bills:

- As of September 18, 1997, treasury bills are issued every two weeks.
- Primary distributors submit treasury bill tenders electronically to the Bank of Canada.
- Treasury bills are generally issued with a term to maturity of 98 days, 168 or 182 days and 350 or 364 days. For cash management reasons, treasury bills may also be issued (usually with a term to maturity of less than 91 days).
- Treasury bills are priced at a discount. The return is the difference between the purchase price and the par value. The rate of return (yield) is conventionally calculated by dividing this difference by the purchase price and expressing the result as an annual percentage rate, using a 365-day year. The rate of return is computed as follows:

\[
\text{yield} = \frac{\text{par value} - \text{purchase price}}{\text{purchase price}} \times 365 \times 100 \quad \text{X} \quad \frac{\text{term}}{365}
\]

- Effective April 2008, all new issues of treasury bills are issued in book-entry form only.
- The full amount of the treasury bills are registered in fully registered form in the name of “CDS & Co.”, a nominee of the Canadian Depository for Securities Limited (CDS) and recorded in book-entry form by the registrar.
- Principal is paid in lawful money of Canada to CDS & Co.
- Treasury bills must be purchased, transferred or sold directly or indirectly through a participant of the Debt Clearing/Money Market System (CDSX) operated by CDS.

- Bearer and registered bonds are interchangeable as to denomination and/or form, if available.
- The denominations, serial letters and forms of bearer and registered bonds are as follows:

<table>

- Effective December 1993, all new issues of Government of Canada domestic marketable bonds were issued in registered format only.
- Registration is at the Bank of Canada, Ottawa.
- Government of Canada marketable bonds payable in Canadian dollars are non-callable.
- The dates under “The Closing of Books for Interest” are subject to change without notice. Unless otherwise indicated, the date for the closing of books for interest is the 12th day of the month preceding the interest payment.
- Since 1992, all domestic marketable bonds are sold by auction.

Global Certificates

- From October 1995 to March 2008, all new issues of domestic marketable bonds were issued in global certificate form only. These global certificates were subsequently replaced by a book-entry register.
- A book-entry position for the full amount of the bonds is issued in fully registered form in the name of “CDS & Co.”, a nominee of the Canadian Depository for Securities Limited (CDS).
- Principal and interest are paid in lawful money of Canada to CDS & Co.
- The bonds must be purchased, transferred or sold directly or indirectly through a participant of the Debt Clearing/Money Market System (CDSX) operated by CDS and only in denominations of $1,000 and integral multiples thereof.

**Section 2.2 – Marketable Bonds**

**Information by Maturity Date**

**Interest and Final Payment:**
The bonds bear interest adjusted in relation to the Consumer Price Index for Canada. Interest consists of both an inflation compensation component (“Inflation Compensation”) calculated based on Principal and payable at maturity and a cash entitlement (“Coupon Interest”) calculated based on Principal and accrued Inflation Compensation. Coupon Interest is payable in semi-annual instalments on June 1 and December 1 (the “Coupon Payment Dates”) commencing June 1, 1992. Coupon Interest is calculated by multiplying one-half of the coupon of 4.25% per annum by the sum of the Principal and the Inflation Compensation accrued from the date the first Bond was issued, namely December 10, 1991 (the “Original Issue Date”) to the relevant Coupon Payment Date. At maturity, in addition to Coupon Interest payable on such date, a final payment (the “Final Payment”) equal to the sum of Principal plus Inflation Compensation accrued from the Original Issue Date to maturity will be made.

**Indexing Process:**
An index ratio (the “Index Ratio”) is applied to calculate both Coupon Interest and Inflation Compensation. The index Ratio for any date (“Date”) is defined as the ratio of the reference CPI applicable to such Date (“Ref CPI_Date”) divided by the reference CPI applicable to the Original Issue Date (“Ref CPI_Base”). The reference CPI for the first day of any calendar month is the CPI for the third preceding calendar month. For example, the reference CPI for January 1, 1996 is the CPI for October 1995. The reference CPI for any other day in a month is calculated by linear interpolation between the reference CPI applicable to the first day of the month in which the day falls and the reference CPI applicable to the first day of the month immediately following.

**Calculation of Interest:**
Inflation Compensation accrued to any Date is calculated by first multiplying the Principal by the Index Ratio applicable to that Date (“Index Ratio_Date”) and then subtracting the Principal. Coupon Interest is calculated by multiplying one-half of the coupon of 4.25% per annum by the sum of the Principal and the Inflation Compensation accrued from the Original Issue Date to the relevant Coupon Payment Date.

**Registration and Denomination:**
A book-entry position for the full amount of the Bonds was issued, at closing in registered form in the name of a nominee of The Canadian Depository for Securities Limited (“CDS”). Individual certificates evidencing the Bonds will not be available to Bond owners. The Bonds must be purchased, transferred or sold directly or indirectly through a participant in the CDS book-entry systems and only in denominations of $1,000 and integral multiples thereof.

Information by Maturity Date

Note: The purchase price of the bond includes inflation compensation and accrued interest. Inflation compensation accrues from the original issue date of December 7, 1995. Interest accrues from the last interest payment date.

Interest and Final Payment:
The bonds bear interest adjusted in relation to the Consumer Price Index for Canada. Interest consists of both an inflation compensation component (“Inflation Compensation”) calculated based on Principal and payable at maturity and a cash entitlement (“Coupon Interest”) calculated based on Principal and accrued Inflation Compensation. Coupon Interest is payable in semi-annual instalments on June 1 and December 1 (the “Coupon Payment Dates”) commencing June 1, 1996. Coupon Interest is calculated by multiplying one-half of the coupon of 4.25% per annum by the sum of the Principal and the Inflation Compensation accrued from the date the first Bond was issued, namely December 7, 1995 (the “Original Issue Date”) to the relevant Coupon Payment Date. At maturity, in addition to Coupon Interest payable on such date, a final payment (the “Final Payment”) equal to the sum of Principal plus Inflation Compensation accrued from the Original Issue Date to maturity will be made.

Indexing Process:
An index ratio (the “Index Ratio”) is applied to calculate both Coupon Interest and Inflation Compensation. The Index Ratio for any date (“Date”) is defined as the ratio of the reference CPI applicable to such Date (“Ref PI(Date)”) divided by the reference CPI applicable to the Original Issue Date (“Ref PI(Base)”). The reference CPI for the first day of any calendar month is the CPI for the third preceding calendar month. For example, the reference CPI for January 1, 1996 is the CPI for October 1995. The reference CPI for any other day in a month is calculated by linear interpolation between the reference CPI applicable to the first day of the month in which the day falls and the reference CPI applicable to the first day of the month immediately following.

Calculation of Interest:
Inflation Compensation accrued to any Date is calculated by first multiplying the Principal by the Index Ratio applicable to that Date (“Index Ratio(Date)”) and then subtracting the Principal.

Coupon Interest is calculated by multiplying one-half of the coupon of 4.25% per annum by the sum of the Principal and the Inflation Compensation accrued from the Original Issue Date to the relevant Coupon Payment Date.

Registration and Denomination:
A book-entry position for the full amount of the Bonds was issued at closing in registered form in the name of a nominee of The Canadian Depository for Securities Limited (“CDS”). Individual certificates evidencing the Bonds will not be available to Bond owners. The Bonds must be purchased, transferred or sold directly or indirectly through a participant in the CDS book-entry systems and only in denominations of $1,000 and integral multiples thereof.

Note: The purchase price of the bond includes inflation compensation and accrued interest. Inflation compensation accrues from the original issue date of March 8, 1999. Interest accrues from the last interest payment date.

Interest and Final Payment:
The bonds bear interest adjusted in relation to the Consumer Price Index for Canada. Interest consists of both an inflation compensation component (“Inflation Compensation”) calculated based on Principal and payable at maturity and a cash entitlement (“Coupon Interest”) calculated based on Principal and accrued Inflation Compensation. Coupon Interest is payable in semi-annual instalments on June 1 and December 1 (the “Coupon Payment Dates”) commencing June 1, 1999. Coupon Interest is calculated by multiplying one-half of the coupon of 4% per annum by the sum of the Principal and the Inflation Compensation accrued from the date the first Bond was issued, namely March 8, 1999 (the “Original Issue Date”) to the relevant Coupon Payment Date. At maturity, in addition to Coupon Interest payable on such date, a final payment (the “Final Payment”) equal to the sum of Principal plus Inflation Compensation accrued from the Original Issue Date to maturity will be made.

Indexing Process:
An index ratio (the “Index Ratio”) is applied to calculate both Coupon Interest and Inflation Compensation. The Index Ratio for any date (“Date”) is defined as the ratio of the reference CPI applicable to such Date (“Ref CPI_{Date}”) divided by the reference CPI applicable to the Original Issue Date (“Ref CPI_{Base}”). The reference CPI for the first day of any calendar month is the CPI for the third preceding calendar month. For example, the reference CPI for January 1, 2000 is the CPI for October 1999. The reference CPI for any other day in a month is calculated by linear interpolation between the reference CPI applicable to the first day of the month in which the day falls and the reference CPI applicable to the first day of the month immediately following.
Indexing Process:

CPI (Base) 91.38249
CPI (Dec. 31, 2010) 117.38387
Index Ratio 1.28453

Original Issue Par Value as at Dec. 1, 2010 5,800,000,000.00
- Interest Payment (Dec. 1, 2010) 148,391,840.00
- Interest Earned per $1M (Dec. 1, 2010) 25,584.80
- Index Ratio (Dec. 1, 2010) (1.27924)

Inflation Adjustment: 1,650,274,000
Adjusted Par Value: 7,450,274,000

Calculation of Interest:
Inflation Compensation accrued to any Date is calculated by first multiplying the Principal by the Index Ratio applicable to that Date (“Index RatioDate”) and then subtracting the Principal.

Coupon Interest is calculated by multiplying one-half of the coupon of 4% per annum by the sum of the Principal and the Inflation Compensation accrued from the Original Issue Date to the relevant Coupon Payment Date.

Individual certificates evidencing the Bonds will not be available to Bond owners. The Bonds must be purchased, transferred or sold directly or indirectly through a participant in the CDS book-entry systems and only in denominations of $1,000 and integral multiples thereof.

Interest and Final Payment:
The bonds bear interest adjusted in relation to the Consumer Price Index for Canada. Interest consists of both an inflation compensation component (“Inflation Compensation”) calculated based on Principal and payable at maturity and a cash entitlement (“Coupon Interest”) calculated based on Principal and accrued Inflation Compensation. Coupon Interest is payable in semi-annual instalments on June 1 and December 1 (the “Coupon Payment Dates”) commencing December 1, 2003. Coupon Interest is calculated by multiplying one-half of the coupon of 3% per annum by the sum of the Principal and the Inflation Compensation accrued from the date the first Bond was issued, namely June 9, 2003 (the “Original Issue Date”) to the relevant Coupon Payment Date. At maturity, in addition to Coupon Interest payable on such date, a final payment (the “Final Payment”) equal to the sum of Principal plus Inflation Compensation accrued from the Original Issue Date to maturity will be made.

Indexing Process:
An index ratio (the “Index Ratio”) is applied to calculate both Coupon Interest and Inflation Compensation. The Index Ratio for any date (“Date”) is defined as the ratio of the reference CPI applicable to such Date (“Ref CPI_Date”) divided by the reference CPI applicable to the Original Issue Date (“Ref CPI_Base”). The reference CPI for the first day of any calendar month is the CPI for the third preceding calendar month. For example, the reference CPI for January 1, 1996 is the CPI for October 1995. The reference CPI for any other day in a month is calculated by linear interpolation between the reference CPI applicable to the first day of the month in which the day falls and the reference CPI applicable to the first day of the month immediately following.

Section 3.2 - Canada Premium Bonds (formerly known as the Canada RRSP Bonds)

General Characteristics

The following general characteristics apply to Canada Premium Bonds (CPBs):
Canada Premium Bonds may be redeemed in full or partially on any annual anniversary of the issue date and during the 30 days thereafter. Principal and accrued interest, if applicable, will be paid without charge in lawful money of Canada at any office in Canada of an authorized redemption or sales agent.
Redemption values for the current year are available in the Redemption Value Tables (Form S40) published regularly (or as required) by the Bank of Canada.
The bonds have a direct RRSP and RRIF option available with no fees of any kind and are also fully eligible for self-directed plans.
Interest rates announced are guaranteed. However, if market conditions warrant, the rates may on, or prior to, the issue date, be increased for a specified period.
Canada Premium Bonds are non-transferable and non-assignable except in certain specific circumstances.
Canada Premium Bonds are non-callable.
Since November 1998, beginning with Series P3, Canada Premium Bonds are issued in two forms: Regular Interest “R” Bonds and Compound Interest “C” Bonds.

Interest Payments:

Regular Interest “R” Bonds (beginning with Series P3)
Simple interest is payable by cheque or by direct deposit to the registered owner annually until maturity, or at redemption of the bonds. Simple interest accrues monthly.

Compound Interest “C” Bonds
Compound interest is payable when bonds are redeemed and such interest will be calculated annually at the rate prescribed on all interest earned annually. Compound interest accrues monthly.
