

A NEW DIRECTION FOR CANADA'S BANK NOTES

#vertical10

The \$10 bank note, with depictions of Viola Desmond and the Canadian Museum for Human Rights, acknowledges the past and continuing efforts towards achieving rights and social justice for all Canadians. It is the first vertically oriented note issued by the Bank of Canada.

This note has bold security features that are **easy to check and difficult to counterfeit**. Some of these are enhanced compared with the security features on the current polymer notes.

Remember, bank notes are only secure if you check them!

1. POLYMER

Feel the smooth, unique texture of the note. It is made from a single piece of polymer with some transparent areas.

2. RAISED INK

Feel the raised ink on the front of the note in areas such as the portrait, the word "Canada" and the large number at the bottom.

3. MAPLE LEAVES ABOVE THE PORTRAIT

Look at the three maple leaves above the portrait. The shifting colour of the eagle feather from the back can be seen through the smallest leaf. The largest leaf is a clear window.

4. LARGE TRANSPARENT WINDOW

Look at the detailed metallic images and symbols in and around the large transparent window. **Tilt** the note to see sharp colour changes in the metallic elements. **Flip** the note to see the library ceiling and maple leaves repeated in the same colours and detail on the other side.

5. 3-D MAPLE LEAF

Look at the large maple leaf that appears to be raised. **Feel** it to confirm that the surface is actually flat.

6. TRANSPARENT MAPLE LEAF

Look at the maple leaf on the right side of the large transparent window. It is clear and feels slightly raised on the front of the note.

7. COLOR-SHIFTING EAGLE FEATHER

Look at the pattern in the eagle feather. **Tilt** the note to see the pattern move up and down, and the colour shift from gold to green.
